# 指定檔案下載位置:(非常重要)

The image shows a sequence of three screenshots illustrating the process of downloading a file from SourceForge to a specific location on a Windows PC.

**Top Screenshot:** Shows the SourceForge website with the text "Your FileZilla download will start in 0 s". Below it, a Windows Explorer window titled "另存新檔" (Save As) is open. The address bar shows the path "電腦 > 本機磁碟 (D:) > 00-下載" (Computer > Local Disk (D:) > 00-Downloads), which is highlighted with a red box. A callout bubble with the number "1" and the text "指定下載檔案路徑至:D:/00-下載" (Specify download file path to D:/00-Downloads) points to the "00-下載" folder in the file list.

**Middle Screenshot:** Shows a closer view of the Windows Explorer window. The address bar now shows "D:/00-下載" and is also highlighted with a red box. The file list shows "FileZilla\_3.5.2\_win32-setup" selected.

**Bottom Screenshot:** Shows the download progress window. The file "FileZilla\_3.5.2\_win32-setup" is shown as downloaded. A callout bubble with the number "3" and the text "下載完成" (Download complete) is present. A callout bubble with the number "2" and a red box around the "存檔(S)" (Save) button is also present.
